

LOAD TERMINATIONS

- ☑ This 30 W coaxial load resistor provides a stable 50 Ohm termination and an extremely low VSWR required by circulators and hybrids..
- ☑ It is designed to absorb reflected power when used in conjunction with isolators.
- ☑ It can also be used to terminate unused ports in combiner systems.

DUMMY LOADS 50 OHM 30W

Electrical Data	ALE030
Article Number	D10AA0258A
Frequency	DC—2000 MHz
Power Rating	20 W @ 40°C, 30 W @ 25°C
VSWR (max)	DC—1000 MHz: 1,1 : 1 (max) 1000—2000 MHz: 1,25 : 1 (max)
Impedance	50 Ohm
Termination	N female
Mechanical Data	
Temperature Range	-40 to 40°C
Coolant	Dry (Convectional Cooling)
Length	66 mm
Height	30 mm
Packed Weight	0,066 kg
